

USB Charging Security Cabinet for Smart Phones and other Mobile Devices

Model #DS-MDM-P-248-SC

Item #14752

- Compact and durable steel enclosure houses two state-of-the-art 16-port and two 8-port USB boards (CE, ETL listed) powered by Cambrionix, the most respected leader in USB charge and sync technologies
- Can be used to charge and sync up to 48 iOS devices via USB. **Provides 2.1 Amp charge per port.**
- Features unique future-proof, filed-updatable firmware assuring compatibility with future USB devices or charge protocols. The Cambrionix ChaSync+ simultaneously charges and syncs when connected to a host.
- The Cambrionix API permits user developed scripts for special applications that control remote monitoring and access to connected devices, something no other hub provides
- Pull-out drawers support a capacity of 48 devices with protective cases and/or attached scanners, external batteries or other peripherals
- Dividers are adjustable and removable; drawer bottoms have protective foam
- Includes an additional shelf to hold a MacBook® or other notebook
- Two power supplies: 50-60 Hz, DC output: 12V, 16A, constant current limiting circuit, overload/overvoltage/short circuit protection, all applicable safety approvals. Power supply is dual voltage 100/240 VAC. Power supply plugs into internal outlet with cord (for 110) or external main (240) (provided).
- Includes a three outlet power strip (110 US power only)
- Enclosure door locks via integrated key lock (two keys per unit)
- Dimensions: 20 1/4"W x 18 1/2"D x 23 3/8"H
- Weight: 105 lbs.
- Can be bolted to tabletop
- Optional Lightning cable bundles available or use your own
- Proudly made in the USA°
