

iPad Sync and Charge LED Cabinet

Model #DS-MDM-SC-16U-IPL

Item #14774

- Compact and durable steel enclosure houses a state-of-the-art, professional universal 16-port USB hub (CE, ETL listed) powered by Cambrionix, the most respected leader in USB charge & sync technologies
- Can be used to charge and sync 16 iPads™. Features unique future-proof, field-updatable firmware and the Cambrionix ChaSync+ simultaneous charge and sync when connected to a host.
- LED status indicators at each numbered slot have default displays for charging, fully charged, syncing etc. Can be controlled by certain third-party software or customer scripts.
- The open API permits user-developed scripts for special applications that permit remote monitoring
- Works with a variety of 3rd party MDM software (such as Ground Control) and Apple Configurator
- Pull-out drawer supports a capacity of 16 iPads (not included)*
- External USB port at front of drawer allows easy connection to host for updates and syncing
- Provides 2.1A at each port for all 16 ports when in charge mode
- Includes 16 pre-installed USB to Lightning cables
- Power supply: 225W, 5V, 85~264VAC, constant current limiting circuit, overload/overvoltage/short circuit protection, all applicable safety approvals. PSU is dual voltage 115/230 VAC.
- Includes a two outlet power strip (110 US power only)
- Enclosure door locks via integrated key lock (two keys per unit)**
- Dimensions: 19.25"W x 22.375"D x 10.625"H
- Weight: 55 lbs.
- Enclosure can be bolted to tabletop
- Optional cable bundles available or use your own
- Proudly made in the USA°
