

Sync and Charge Security Cabinet for Smart Phones and other Mobile Devices

Model #DS-MDM-SC-24U

Item #12024

- Compact and durable steel enclosure houses state-of-the-art universal USB hubs providing 24 ports
- Can be used to charge and sync any iPod™, iPod Touch and iPhone™; as well as virtually any smart phone that charges with USB (up to 2.1A constant charge per port).
- Features unique future-proof, filed- updatable firmware and the Cambrionix ChaSync+ simultaneous charge and sync when connected to a host
- Syncing is done through iTunes™, Configurator and MDM software that connects via USB
- The Cambrionix API permits user-developed scripts for special applications that control remote monitoring and access to connected devices, something no other hub provides
- Pull-out drawer supports up to 24 devices with protective cases and/or attached scanners, external batteries or other peripherals
- Dividers are removable and devices sit in protective foam slots
- Power supply: 275W, 5V, 88~264VAC, constant current limiting circuit, overload/overvoltage/short circuit protection, all applicable safety approvals. Power supply is dual voltage 115/230 VAC. Power supply plugs into wall outlet with cord (provided).
- Enclosure door locks via integrated key lock (two keys per unit)
- Cabinet dimensions: 19.25"W x 22.375"D x 10.625"H
- Individual slot dimensions: 1.25"W x 3.5"D x 7"H
- Weight: 55 lbs.
- Can be bolted to tabletop
- Optional Lightning cable bundles available or use your own
- Proudly made in the USA°
